Lessons themes on pharmacology for 3rd year student's faculty of foreign students in 2026 – 2027 academic year

№	Theme	Date of lesson
V semester (с 01.09.2026 по 09.01.2027)		
1.	Pharmaceutical sciences, pharmacy, pharmacopeia, structure of the prescription. Solid dosage forms	07.09 – 12.09.2026
2.	Liquid dosage forms.	14.09 – 19.09.2026
3.	Parenteral dosage forms. Soft dosage forms	21.09 – 26.09.2026
4.	Basics of pharmacokinetics. Principles of dosage of medicines	28.09 – 03.10.2026
5.	Pharmacodynamics of drugs. Drug interactions.	05.10 – 10.10.2026
6.	Final lesson on general pharmacology and general prescription.	12.10 –17.10.2026
7.	Drugs affecting the peripheral nervous system. Agents affecting afferent transmission of nerve impulses.	19.10 – 24.10.2026
8.	Pharmaceuticals affecting efferent innervation. Cholinergic drugs. M-cholinomimetics. Anticholinesterase agents. M-cholinoblockers.	26.10 – 31.10.2026
9.	Cholinergic drugs. N-cholinomimetics, N-cholinoblockers (ganglionic blockers, curare-like agents).	02.11 – 07.11.2026
10.	Adrenergic agents.	09.11 – 14.11.2026
11.	Drugs affecting the central nervous system. Drugs for general anesthesia. Ethanol. Hypnotics.	16.11 – 21.11.2026
12.	Analgesics.	23.11 – 28.11.2026
13.	Anticonvulsants. Antiparkinson drugs. Antipsychotic drugs.	30.11 – 05.12.2026
14.	Anxiolytics. Sedatives. Antidepressants. Normothymic, nootropic, psychostimulating agents. Analeptic drugs.	07.12 – 12.12.2026
15.	Final lesson on neurotropic drug.	14.12 – 19.12.2026
16.	Drugs affecting respiratory system.	21.12 – 26.12.2026
17.	Drugs affecting gastrointestinal system».	28.12 – 02.01.2027
18.	Drugs affecting the function of gastrointestinal system (ending).	04.01 – 09.01.2027

Head of department E.I. Mikhailova

Lessons themes on pharmacology for 3rd year student's faculty of foreign students in 2026 – 2027 academic year

№	Theme	Date of lesson
VI semester (с 08.02.2027 по 05.06.2027)		
1.	Drugs for the treatment of heart failure. Cardiotonics. Antiarrhythmic drugs.	08.02 – 13.02.2027
2.	Antianginal agents. Agents for correcting local blood flow disorders. Hypolipidemic agents.	15.02 – 20.02.2027
3.	Antihypertensive agents and other medications regulating systemic arterial pressure.	22.02 – 27.02.2027
4.	Diuretic agents and other agents affecting the function of the urinary system. Agents influencing the tone and contractile activity of the myometrium.	01.03 – 06.03.2027
5.	Drugs affecting blood.	08.03 – 13.03.2027
6.	Final lesson on drugs affecting the function of executive organs.	15.03 –20.03.2027
7.	Agents regulating tissue metabolism. Polypeptide hormones and antihormonal agents.	22.03 – 27.03.2027
8.	Steroid hormones.	29.03 – 03.04.2027
9.	Vitamins and vitamin-like substances.	05.04 – 10.04.2027
10.	Antiinflammatory and antigout drugs. Antiallergic drugs. Immunomodulators.	12.04 – 17.04.2026
11.	Hemotherapeutic agents. Concept of chemotherapy. The principles of action of antibacterial agents. Antibiotics (ß-lactam antibiotics, macrolides, tetracyclines).	19.04 – 24.04.2027
12.	Antibiotics (ending). Synthetic antimicrobial agents.	26.04 – 01.05.2027
13.	Antimicobacterial, antiviral, antifungal drugs.	03.05 – 08.05.2027
14.	Antiprotozoic and antiparasitic drugs. Antiseptics and disinfectants and prevention of healthcare-associated infections.	10.05 – 15.05.2027
15.	The final session on antimicrobial, antiviral, antiparasitic drugs	17.05 – 22.05.2027
16.	Antineoplastic agents.	24.05 – 29.05.2027
17.	Antidotes and principles of medical care in acute drug poisoning.	31.05 – 05.06.2027

Head of department E.I. Mikhailova
